Ian Anderson
Vice-Chair, Order in Council
Ontario Labour Relations Board
505 University Ave, 2nd Floor
Toronto, ON M5G 2P1

Dear Vice Chair Anderson

Re: OLRB File # 1115-04-U

Please be advised that with respect to the above matter, the Ontario English Catholic Teacher's Association (OECTA) has frustrated my efforts. I have attached the letter sent by Ed Chudak pertaining to contacts and correspondence.

I agreed to an assessment by a psychiatrist who would be located in the Sault, should one be available. I have obtained a female psychiatrist who I trust, is of high integrity and who understands my situation and the stress that it has caused me. Mr. Chudak made no effort to arrange this for me in the Sault but rather quickly called me the following day of our meeting indicating that there were no psychiatrists in the Sault available and that he would set up an assessment for me in Toronto with their psychiatrist, Dr. Hy Bloom. Dr. Bloom's assessment of my situation would be completely biased and would favour OECTA's desire to fraudulently hire me back to my original fulltime teaching position and put me on disability.

This stressful situation temporarily caused me to be hospitalized for a time this year. I have not needed medical attention for 10 years prior to that. I am back to my regular nutritional and healthy lifestyle regime and will not be forced to take psychiatric mood altering medication. The York Catholic School Board's attempt to destroy my teaching career, my educational business, my health and my life was the reason I became ill in the first place and decided to hospitalize myself.

From the start of this labour relations dispute, I flatly refused the option of fraudulent disability claims and rather demanded a pay out settlement for damages done to my life, 10 and 13 years ago while employed with the York Catholic Board, and to retirement age (since they have prevented me from teaching in the Sault at both boards as well). Since that disability situation 10 years ago, I built an education system from ages 2-18 years old which enabled students the ability to be independent thinkers and offered them an effective, affordable teaching system that does not inhibit them from exploring their interests and suppressed information. The school system controls minds and refuses students to become free thinkers. It is based on much disinformation, confusion, lies and meaningless memory work.

I tried to present this concern that I had with the curriculum to OECTA and the school board. As a result, they chose to lie and accused me of quitting my supply-teaching job. Had I been still teaching fulltime, I knew that the repercussions to my life would be far greater had I tried to expose this corruption, considering I had suffered a great injustice a decade ago, when I tried to introduce Organics, healthy eating and my efficient study method in my Biology classes.

OECTA's behaviour has clearly proven to me their dishonesty, incompetence and corruption based on greedy, selfish desires. I fail to see where I am incompetent (as I have been accused of being, by OECTA). I am guilty of knowing too much for the education system. This is a tragedy for the students, society and my own well-being. By manipulating education and the media, people become mind controlled. My desire is to teach the truth.

Initially, there should be proof that I quit my supply job, as OECTA has claimed. This lie has severely affected my life and finances. OECTA had the power to morally restore integrity in the education system. Instead, they tried to destroy me and cover up the corruption.

They have issues with my competence?

Competence- 1. Meaning capable, having sufficient ability 2. Sufficient for the purpose; adequate. 3. Belonging as a right.

The system wants to cover up and refuses to address the corruption that I have undeniable proof about and a vast understanding of. They have not proven me wrong, just ignored and labeled me incompetent. When the public discovers the cover-up and corruption (which I will dedicate my life to exposing) then we shall see who is incompetent.

I agree that I am not capable of working in a system that is corrupt, deceiving, ineffective, dangerous and based on greed. Their trauma based mind control has destroyed my life and teaching career.

I don't have anything to hide when it comes to being assessed by Dr. Hy Bloom. I just fear for my own safety while in the hands of OECTA. If they know of my whereabouts while I am there, it is nothing for them to eliminate the problem and me. Knowledge of what I know and try to expose has left many people dead or their health and loved ones threatened. Aside from that, I don't trust his judgment and prefer to choose my own psychiatrist, preferably in the Sault.

I leave the decision in your hands with respect to how we should proceed.

Sincerely

Dana Horochowski BSc, BEd, RNCP
